

ABDULLAH FARIZ HASSAN

farizhassan99@gmail.com | 013-2521229 | Kuala Lumpur, Malaysia | farizhassan.com

Summary

Tech enthusiast with a strong interest in applying technology to solve real-world problems and drive innovation. Experienced in combining technical skills with creative work through freelance illustration and 3D modelling. Passionate about continuous learning and adapting to emerging technologies in a fast-evolving industry.

Experience

SOFTWARE ENGINEER | Datakraf Solutions Sdn bhd - Wangsa Maju, Kuala Lumpur | 08/2024 - Current

- Co-led design of prototype project for MyINFRA system, contributing to innovative solutions.
- Developed Software Requirement Specification (SRS) documentation for earlier MyINFRA modules, ensuring clarity and alignment.
- Collaborated with the development team to clarify functionality, usability, and design alignments, enhancing project outcomes.
- Managed change initiatives, including creating loading animations, PowerPoint presentations, and promotional materials.
- Provided on-site IT support to resolve technical issues and assist users.
- Contributed to the design of the MyINFRA logo, ensuring brand consistency and visual appeal.

JUNIOR IOT PROGRAMMER/ IT EXECUTIVE | Syswell IoT - Puchong, Selangor | 10/2022 - 01/2023

- Implemented IoT devices in office environments, deploying smart system devices for door access, lighting, and fan control to enhance operational efficiency.
- Achieved the implementation of Over-The-Air (OTA) communication for smart devices installed within walls, where wired connections were impractical.
- Created TelNet access for all devices, improving connectivity and management for enhanced control over the system.
- Revamped user-interface (UI) design to facilitate better room identification and device monitoring in the device management system.
- Troubleshooting front-end applications for seamless user experiences.
- Produced a video introduction detailing smart devices, their maintenance, updates, and control procedures, explaining the smart devices, their maintenance, updates, and appliance control.

SITE INSPECTION INTERN | MRT Corp - Bukit Damansara, Kuala Lumpur | 08/2019 - 12/2019

- Conducted site inspections to evaluate conditions and ensure compliance with safety regulations, including the safety of workers, quality of workmanship, and safety inspections according to OSHA.
- Oversaw construction progress of MRT Viaduct per span, ensuring timely completion from initial piling to final span.
- Prepared monthly reports detailing work quality and any structural issues for review by Viaduct Span supervisor.
- Developed comprehensive knowledge in the specialised field of rail works for MRT locomotives.

FREELANCE ILLUSTRATOR/ 3D MODELLER | Self Employed | 01/2017 - 04/2024

- Manage the end-to-end creative process - from concept development and sketching to final digital rendering.
- Collaborated with non-profit organisations and individuals to create bespoke illustrations that effectively align with their branding and messaging.
- Delivered freelance digital illustration services for non-profit projects, enhancing promotional and educational materials.
- Completed custom art commissions from online platforms such as Twitter, Sketchmob, Fiverr, Discord, ensuring timely delivery and high client satisfaction.
- Maintain an active online presence to engage audiences and attract commission opportunities.
